DESCRIPTION

INTRODUCTION

Infections in orthopaedic surgery and traumatology are one of the most complex diseases in our specialty. For its correct diagnosis and treatment, a multidisciplinary approach and a high theoretical and surgical knowledge are essential. Although it is a type of pathology that every specialist will have to face on numerous occasions throughout their professional life, today there is little face-to-face, participatory, and practical training for residents.

PROJECT

Different members from EBJIS and SECOT (Spanish society of orthopaedic surgery and traumatology) Osteoarticular Infection Work Line propose to carry out a PRESENTIAL course of a day and a half: Thursday all day and Friday morning. The venue of the course will preferably be a hotel where attendees will stay. In this way, the risk of absenteeism is minimized while seeking to promote a more relaxed and informal networking environment.

Prior to the course, each resident will be sent a summary of the clinical cases that will be addressed, as well as a list of recommended articles to reinforce the theoretical basis of the pathology to be treated.

Throughout the presentation of each case, which will be reinforced by power point slides, the coordinator will pose questions (kahoot) that will allow progress in the development and completion of each case.

OBJECTIVE

The objective of this course is to allow participants to deepen their knowledge of the most common infections in orthopaedic surgery and traumatology.

PARTICIPANTS

This first edition of the course is aimed to 4th and/or 5th year residents of Orthopaedic Surgery and Traumatology from Spanish hospitals.

Initially, it is proposed to open the course to 40 participants. However, if there is greater demand, it is planned to create a waiting list for future editions. In such a case, priority would be given to senior residents.

TEACHERS

All teachers will be specialists with proven experience in the diagnosis and treatment of osteoarticular infections. Most of them will be members of EBJIS and/or SECOT and active members of the Society Osteoarticular Infection Work Line.

It is expected to have participation from other specialties (infectious medicine, radiology or microbiology), who usually form part of the multidisciplinary medical team that allows the correct approach to these pathologies.

PROGRAMME

WEDNESDAY, 22nd NOVEMBER

18:30-19:00 Handing over documents

19:00-19:30 Presentation

Lluís Font-Vizcarra. Barcelona

THURSDAY, 23rd NOVEMBER

08:30-10:30 **Theoretical sessions based on clinical cases**

Residents will be divided into 4 groups of 10 participants. Each group will “rotate” through four rooms where 4 sessions will be held. Each session will last 1 hour

Session 1: Osteoarticular infections not associated to implants

CASE A: Effusion, pain and redness of the knee.

Differential diagnosis and treatment

Nerea Hernández (Hospital de Cruces. Bilbao)

CASE B: Soft tissue infection. How to differentiate and treat different entities

José Luis Del Pozo (Clínica Universitaria de Navarra)

Session 2: Acute prosthetic infection. Diagnosis and treatment

CASE A: Poor evolution of surgical wound after prosthetic surgery. Superficial or deep?

Francisco Argüelles (Hospital Universitario La Fe. Valencia)

CASE B: Treatment of the acute prosthetic infection.

Until when and how to debride

Álvaro Auñón (Fundación Jimenez Diaz. Madrid)

10:30-11:30 Coffee break 

11:30-13:30 **Session 3: Infection after fracture**

Case A: Acute infection. Diagnosis and treatment

Maribel Pérez Núñez (Hospital Universitario Marqués de Valdecilla. Santander)

PROGRAMME

THURSDAY, 23rd NOVEMBER

CASE B: Chronic infection. Diagnosis and treatment

José Martínez Ros (Hospital Virgen de la Arrixaca. Murcia)

Session 4: Chronic prosthetic infection. Diagnosis and treatment

PART A: Painful prosthesis in outpatient clinic. What do I do?

Ernesto Muñoz (Hospital Clínic. Barcelona)

PART B: Replacement in one or two times. Which is the best option?

José Cordero (Hospital Universitario de La Princesa. Madrid) /

Juan Carlos Martínez Pastor (Hospital Clínic. Barcelona)

13:30-15:00 Lunch 

15:00-18:30 Workshops (50 min each; 10 min theory, 40 min practice)

1- Negative pressure therapy workshop. Indications. Assembly
(Pending speaker)

2- Nail lining workshop

Margarita Veloso (Hospital Universitari Mútua de Terrassa)

3- Workshop of external fixators - basic assemblies.

Confection of external fixator for tibial bone transport

Pablo Corona (Hospital Universitari Vall d' Hebron. Barcelona)

4- Local antibiotic therapy workshop

Jose Baeza (Hospital Universitario La Fe. Valencia)

20:30 Dinner

PROGRAMME

FRIDAY, 24th NOVEMBER

08:30-14:00 Clinical cases

08:30-09:30 Selection of clinical cases for presentation **Kahoot!**

09:30-10:45 **First clinical case**
Pablo Sanz (Hospital Universitario Gregorio Marañón. Madrid)

09:45-10:30 Coffee break 

10:30-11:15 **Second clinical case**
José Lamo de Espinosa (Clínica Universitaria de Navarra)

11:15-12:00 **Third clinical case**
Marta Sabater (Hospital Clínic. Barcelona)

12:00-12:45 **Fourth clinical case**
Lluís Font-Vizcarra (Hospital Universitari Mútua de Terrassa)

12:45-13:30 **Quiz** 
Four residents (1 from each group) will present the practical clinical cases that we will discuss together.

13:30-15:30 **Lunch and awards**
Prize for the best case (*assessment by moderators*)
Prize for the best student (*according to the quiz score + quality vote of the teachers of each of sessions*)
